## “Mechanical Ventilation: Key Concepts Explained Simply”

Presented by:

**Christiane Perme, PT CCS FCCM**

**July 14, 2022-** Thurs- 4-8:30 PM - Central Time

**August 25, 2022-** Thurs- 2-6:30 PM - Central Time

**October 15, 2022-** Sat- 8AM-12:30 PM- Central Time

**December 1, 2022-** Thurs- 2-6:30 PM - Central Time

## Webinar Description

Therapists play a critical role in the management of patients receiving mechanical ventilation. This 4-hour webinar is ideal for any therapists who are currently or considering working with patients on mechanical ventilation in ICU, long term acute care hospitals, or home health services. The content is focused on essential information and includes an overview of basic concepts, invasive mechanical ventilation, and non-invasive ventilation. This webinar will guide clinicians through the process of understanding the complexities of mechanical ventilation concepts in a simple and practical manner. It will also inspire therapists to immediately apply the learned mechanical ventilation material to clinical and academic practice.

## Testimonials

*"Great visual examples of various vent settings and impact of vent settings on patient care, also great information of specific vent settings and how they apply to mobility in the ICU..."*

*"The course was AMAZING!!!"*

*"Chris' enthusiasm and encouragement are priceless, really motivating to go to work on Monday and apply what I learned today!"*

*"Clearly and simply defined the way the ventilator works for therapists."*

*"The entire webinar was helpful. I especially found the thorough explanation of the various modes of ventilation and implication for therapy helpful."*

*"The case study at the end tied everything together very well."*

## "Mechanical Ventilation: Key Concepts Explained Simply"

### Objectives

- Upon completion of this webinar, the participants will be able to:
1. Identify ventilator settings and patient data on ventilator screen
  2. Describe the significance of PEEP
  3. Explain three common modes of mechanical ventilation
  4. Discuss two indications for non-invasive ventilation
  5. Synthesize information for use in clinical and academic therapy practice

### Schedule

- Overview of mechanical ventilation: Key concepts
  - Break: 10 minutes
- Invasive mechanical ventilation
  - Break: 10 minutes
- Non-invasive ventilation
  - Break: 10 minutes
- Solidifying knowledge with practical application
- Discussion & Final thoughts
